

**IN THE CLAIMS:**

The following is a complete listing of claims in this application.

Claims 1-4 (canceled).

5. (new) An under-skate assembly for an ice skate for attachment to a skate shoe, comprising a resilient frame structure defining at least one open section, means for attaching the frame structure to a skate shoe and means for attaching the frame structure to a blade disposed opposite to the means for attaching to the skate,

the resilient frame structure being constructed and arranged to flex and cause the blade attached thereto to flatten as weight is applied thereto.

6. (new) Assembly according to claim 5, additionally comprising the elastic means comprises a spring or compressed air.

7. (new) Assembly according to claim 5, wherein a blade is integral with the frame structure.

8. (new) Assembly according to claim 5, wherein the means for attaching the blade comprises a push-click mount with adapted profiles.

9. (new) Assembly according to claim 5, wherein the frame structure comprises a plurality of open sections.

10. (new) Assembly according to claim 5, wherein the frame structure additionally comprises at least one brick that is movable longitudinally or up/down.
